

DMT AL NAB2006

Dear Sirs,

From entertainment to news to business communications, NAB2006 is the only global event that covers the entire spectrum of media. Experience comprehensive business and technology insights and innovations covering every aspect of audio and video content production, management and distribution across all forms of media.

To see all of this, we are pleased to invite you at NAB 2006 at the Las Vegas Convention Center, next April 24-27, 2006 (Conferences, April 22-27). On that occasion, DMT will be exhibiting their full equipment lineup, including:

- new ATSC-DTV standard digital modulator, incorporated in a complete demo unit to show its features;
- liquid-cooled "High Power" transmitters, available in digital (ATSC-DTV and DVB-T/DVB-H standards) and "digital ready" configurations, whereby the latter can be converted to digital operation by simply adding the exciter
- air-cooled "Medium-High Power" transmitters, in digital (ATSC-DTV and DVB-T/DVB-H standards) and "digital ready" analog versions, also available with the new amplifier module that simplifies maintenance with its "split" structure divided into two sub-modules;
- "Low Power" transmitters and digital, analog translators featuring high performance quality;
- antenna systems VHF1, FM, VHF III and UHF bands: customized systems, answers to any operational need

DMT offers you the opportunity of free registration to visit the exhibition. Go to www.nabshow.com, select Register Today with a VIP Exhibits Pass. Then enter our code RC1197. In case you have no Web access, you can call NAB's Customer Service Representative at 1-888-740-4622 or 1-301-682-7962.

We are looking forward to meeting you at our Booth C316, to show you the latest developments of our world-class technology, and to share a cup of coffee.

Best regards,
DMT S.p.A.
